## JOURNALISM WORKSHOP

hilton anatole . august 2-4, 2011

### SUPPLY LIST

While most workshop supplies will be provided, instructors have requested that students bring the following additional items:

- Each yearbook student (excluding photography and computer students) needs to bring magazines (for design work), a glue stick, a felt tip marker, pencils, scissors and a note pad. Each yearbook staff should also bring some poster boards and a copy of their most recent yearbook. Laptops are not required, but are highly recommended. Pocket dictionaries, thesauruses, idiom dictionaries and rhyming dictionaries are very helpful.
- Students in the computer sessions will need to bring their own computers. Please make sure that your computer has the software program that you use for your publication(s) loaded on the hard drive. You should also bring at least one USB flash drive or CD to save your work.
- Newspaper students should have recent copies of their school newspaper, pen or pencil, a glue stick, and a note pad. Laptops are not required, but are highly recommended.
- Traditional Photographers should bring a 35mm camera and three rolls of 24 exposure 400 ISO color negative film. Also bring an extra camera battery(s).
- Digital Photographers should bring a digital camera and a computer with Photoshop installed. In addition, photographers should bring what is necessary (software, cables, memory card readers, etc.) to download photographs from the digital camera to the computer. Please bring extra camera batteries or the camera charger.
- Hilton Anatole has a business center available with a printer should you need it for your projects. If your staff has access to a portable printer, we'd recommend bringing it to the hotel.
